

Call for Proposals: American University of Armenia–GW Collaborative Research Program

Basic Information

Title:	American University of Armenia–GW Collaborative Research Program
Award Period:	Up to one year
Purpose:	To establish collaborative projects between researchers affiliated with the George Washington University (GW) and researchers affiliated with the American University of Armenia
Deadlines:	Rolling application submission and review
Eligibility:	Researchers affiliated with GW and researchers affiliated with the American University of Armenia may submit joint research proposals. Principal investigator (PI) eligibility is determined by the schools. Emeritus faculty are not eligible.
Funding Amount:	GW will allocate up to \$5,000 towards the expenses of its own PI and American University of Armenia will match funding for the collaborator.
Administrative Contact:	askovpr@gwu.edu
Website:	https://research.gwu.edu/international-research

Program Description

The American University of Armenia and the George Washington University (GW) have launched a program to fund joint collaborative research projects. Under this scientific cooperation agreement, collaborations can be in any field, including engineering, public health, medicine, science, and humanities.

GW PI Eligibility Criteria

Eligibility to serve as a principal investigator (PI) is determined by the schools. The GW International Research Program considers projects jointly submitted by active-status faculty/researchers who are continuing in service at GW the following academic year and a professor/researcher with a permanent affiliation with a non-U.S. research institution or institute of higher learning. Note that projects involving human subjects may have additional PI eligibility requirements. See the [Office for Human Research](#) for additional information.

Budget

Typically, awards will provide up to \$10,000 (\$5,000 funded by GW and an amount no less than GW's contribution funded by the American University of Armenia). Travel and travel-related expenses are the only allowable costs for GW researchers.

Funding is **not** available to support:

- pay for release time for faculty;
- equipment purchases;
- everyday living expenses;
- salary or stipends for students or post-docs; or
- attending conferences and workshops.

Application Procedures

Applications may be submitted at any time and are reviewed on a rolling basis.

Proposal Submission

The complete proposal must be submitted electronically using the **application form** found [here](#) and include the following documents (**supporting documentation**) merged into a single file. The **supporting documentation** must be in the order indicated below in one PDF file. This attachment is not to exceed seven (7) pages.

Proposal Components

- **The application form** found [here](#).

Supporting Documentation merged as one PDF file and uploaded to **application form**:

- **A description of the project**, including a timetable for completion, not to exceed **ONE** page. The description should indicate how the project contributes to scientific knowledge and research methods within the applicants' fields; the nature of the collaboration proposed; the involvement of junior scholars (detailing their names and roles in the project); the proposed impact of the collaboration, both in scientific terms and institutionally; and how results of the proposed collaboration (e.g. preliminary findings) will be incorporated into a proposal for external funding.
- **Letters of intent**, from each of the GW and the American University of Armenia research project collaborators indicating their commitment to work together and to observe a proposed calendar of expenses. The letter should describe prior work with the proposed collaborator, the collaborator's role in the project, and what resources each partner will bring to the project. Each letter may not exceed **ONE** page.
- **A detailed budget**, indicating a breakdown of the budget request by category (airfares, lodging, etc.) and an account of other sources of funding (potential and actual)—not to exceed **ONE** page.
- **A curriculum vitae of each project collaborator** not to exceed **TWO** pages each.

Review Process

Awards will be based on the merits and design of the project and on the *clarity of the written proposal*. A key consideration in the selection of funding recipients will be the probability of the collaboration to **secure extramural funding**.

Award Administration

OVPR will transfer the award fund to a designated PI's department. All award expenses should be charged to that PI's department. The PIs are expected to expend the award funds in a manner consistent with the approved budget and in keeping with the university's policies. Department must track expenses and report them during data collection for NSF HERD survey.

FUNDED PROPOSALS INVOLVING HUMAN RESEARCH PARTICIPANTS, USE OF ANIMALS, HAZARDOUS MATERIALS, AND RADIATION SOURCES must be approved through the Office of Human Research, the Office of Compliance and Privacy, the Office of Research Integrity, and/or the Technology Commercialization Office before the actual research begins. For more information, consult these pages:

- [Office of Human Research](#)
- [Office of Animal Research](#)
- [Office of Laboratory Safety](#)

All travel must adhere to GW's Travel Policy found here:

- [Domestic Travel](#)
- [International Travel](#)

Patents and inventions that arise from work performed should be disclosed to the university. For more information, consult [this page](#).

FINAL REPORT: Recipients are required to submit a brief grant report no later than 30 days after the end of your award that includes identified products (manuscripts, creations, etc.) and if a research project, specific plans/activities for submission for external funding.
